PMP certified engineer  
looking for  
a challenging position  
in Project Management  
in France

### Work experience (References available upon request)

2017-2019

*1.5 years as project PMO in Nantes and Saint-Nazaire, at MI-GSO*

I launched **all project management tools and processes** for a 40M€ project (A350 ramp-up). Closely with the project manager, I **trained 30 people on PM principles**, and helped building the PM framework on **cost, time, and scope**. I steered daily meetings, designed the solution. I summed up all my work within a **full Project Management Plan**, validated by Airbus. The success of this mission led Airbus to ask me to support another 40M€ project during 6 months. In 2019 I then spent 8 months travelling abroad for personal purposes.

2015-2017

*2 years as project analyst in Gloucester, United Kingdom, at PCUBED.*

I set up a team of 5 Project Management Officers to cover **management support** for Safran Gloucester (+30M€ of managed budget). I created and validated with the customer: **new PM processes**, and **full MS Project schedules**. The business confirmed noticeable improvements.

Also, I managed the **integration, scope, time and cost** of the landing gears engineering for A330-A340, and several Military and Commuters jets (8.7M€). I led weekly meetings with Project Chief Engineers and Group Leaders, giving status, way forwards and risks. Mission successful and strong links built with stakeholders.

2013-2015

*2 years as PMO in Toulouse, at MI-GSO.*

I managed the ground tests department **dashboards, processes and reporting** for the first Airbus A350, as well as **5 improvement projects** (500k€ each) with proper preparation, lean management, work meeting animations, gates drumbeat, KPIs. I supported my customers by **scheduling** a challenging reduction of 30% of the FAL tests duration (deep dives, crashing, fast tracking) for which I organised workshops in Toulouse, Bristol and Hamburg.

2012

*Engineering internship in Paris, IPCS society: **Project management** on prestigious buildings (“Hôtel des Invalides”, “Cinéma du Louxor”). I animated weekly meetings, optimized schedules, launched new projects and follow-ups.*

### Education

2010-2013

*Graduated from the engineering school “École des Mines” (2013), Albi, France*

Major in **Industrial Engineering, Processes and Information Systems**. Projects with BPMN, UML. Project management. Preparation of the **PMI. Industrial management** (Production, Quality improvements), Statistics, Market studies, Data analysis, Functional specification. **Scientific and Industry basics** (Thermodynamics, Fluid Mechanics, Materials, Aeronautics...), Systems analysis, Databases (MySQL, Access)

2012

*Karlstad University, SWEDEN: Academic exchange. “Master of industrial marketing and organization”.*

2008

**Preparatory classes:** MPSI, MP, Successfully passed the *Concours des Mines*

### Competences

PMP

Certified with the PMI’s **Project Management Professional**® (PMP Licence 1986177)

Good expertise of all PM knowledge areas and process groups, can bring proactively new ideas and new tools. Agile training done in October 2016 within PCUBED, and applied professionally

Informatics

Advanced knowledge and use of **MS Project, Excel VBA**, Visual Management, Pivot Tables), Word, PowerPoint. Languages: VB, Python.

Communication

**French:** Mother tongue.

**English:** Fluently and professionally spoken, written and read, 2 years mission abroad.

**Spanish:** Good level, 8 months of travelling in South America in 2019

**French Sign Language and German:** Beginner level, training done with Airbus

### Miscellaneous

Leisure Activities

Endurance (Wintertrail 60km in snowshoes, Transjurassienne 72km cross-country skiing, half-marathons), Music (11 years of guitar, electronic music), Climbing (10 years), Rugby, Theatre (5 years), board games, electronics and informatics (Arduino), Travels and adventures

Other

Full clear driving licence, International driving licence, Diploma for youth leaders and workers (BAFA)
